RE: Certification of Conformance and Delivery for TMAX

To Whom it May Concern:

This document has been drafted to provide certification as to the origin, properties and delivery of TMAX, a High Performance Turf Reinforcement Mat (HPTRM). TMAX is produced by North American Green (NAG). The material is produced in the United States. Each roll is subjected to regular inspection and testing in accordance with the NAG Quality Assurance Program. Properties and specifications of the material are provided on document number WG_MPDS_TMAX, attached as reference. Installation documentation may be found at www.nagreen.com.

Since most NAG products are sold to distributors and stocked, NAG is typically unable to certify material type or quantity delivered to the project/project site. However, space is provided below for distributor/contractor certification of materials delivered to the project/project site.

To the best of our knowledge, the information included is accurate.

Jill Pack
